SUMMARY

As a recent Psychology graduate at the University of North Carolina at Chapel Hill (UNC-CH), I am searching for valuable experience in any field. With my experience as an academic tutor and working in the education system, I am inspired to utilize my ability in relaying information and catering to the needs of others.

SKILLS

TEACHING AND EDUCATION SKILLS

- Strong critical thinking skills.
- Clear and compelling communicator when working in teams.
- Ability to streamline and relay complex concepts.
- Proactively engaging with students and catering to their individual needs.
- Ability to think creatively when a solution is not apparent.
- Proven teaching, guidance, and counseling skills.
- Attention to detail and organizing materials for others to follow.

TECHNICAL SKILLS

- Creating responsive, inclusive, and accessible websites using HTML, CSS, and user interface (UI) design.
- Ability to work independently and be creative when help is not accessible.
- Experience in running basic statistical analyses using R.
- Ability to organize and manage multiple projects.
- Interpreting data and conducting statistical and item analysis using R and SPSS.
- Strong visualization skills.
- Developing and maintaining client relations within a business.
- Conducting professional business communication during project evaluations.
- Organized and clear communication with other business partners.
- Proficient in Microsoft Excel (able to sort and analyze data, filter data, use formulas, create graphs and data tables)
- Proficient in Microsoft Powerpoint

PROJECTS

Personal Tutoring Website To showcase my HTML, CSS, JavaScript, and UI design skills, I decided to develop a website that advertises my personal tutoring. No template was used and the entire website has been developed from scratch. The website is targeted at primarily high school and collegiate students, but is also for parents seeking personable and local online tutoring for their children.	May 2022 - Current
Student Organization Website In accordance with my Intro to Web Design/Development course, I was tasked with creating a website for a student led organization at the University of North Carolina at Chapel Hill titled "Active Minds at Carolina". Active Minds focuses on mental health and connects students with mental health resources in the community. I developed a fully responsive user interface (UI) design and coordinated with an organization representative to meet their website needs. Additionally, I was a lead developer in providing the overall code and formatting of the website using HTML and CSS. I developed the overall site's layout (i.e., navigation bar and footer), responsivity, and the home page as well as the contact for UNC-CH students page.	Mar. 2022 - May 2022
